- Awarding Organisation: **OTHM**
- Qualification Level: **Level 7**
- Total Credits: **120**
- Total Qualification Time: **1,200 hours**
- Guided Learning Hours: **600**
- **Duration:** Flexible delivery; designed for one academic year of full-time study
- **Study Mode:** Face-to-face, online or distance learning, subject to approved centre arrangements

ABOUT THE QUALIFICATION

The OTHM Level 7 Diploma in Occupational Health and Safety Management is designed for professionals who want to strengthen their ability to manage health and safety at a strategic level.

The programme develops the knowledge and skills required to establish effective health and safety management practices, evaluate organisational risks, improve workplace wellbeing, and support sustainable and ethical business operations.

It is suitable for experienced HSE professionals, safety managers and individuals seeking career progression into senior occupational health and safety roles.

WHAT WILL YOU LEARN?

The qualification consists of six mandatory units, each carrying 20 credits.

1. Health and Safety Management Practice

Develop an advanced understanding of health and safety management practices and their application within organisations.

2. Effectiveness of Health and Safety Management Systems

Understand how to evaluate, implement and improve health and safety management systems to support organisational performance.

3. Factors Affecting Risk and Strategic Risk Intervention

Explore the factors influencing workplace risks and develop strategies for effective risk intervention and control.

4. Strategic Commitment to Health and Well-Being

Learn how organisations can develop strategies to improve occupational health, employee wellbeing and workplace performance.

5. Sustainability and Ethics in Health and Safety Practice

Understand the importance of ethical decision-making, sustainability and responsible health and safety leadership.

6. Advanced Research Methods**

Develop research skills and the ability to critically analyse information, evaluate evidence and apply research methods in an occupational health and safety context.

ENTRY REQUIREMENTS

Applicants are generally expected to meet one of the following academic requirements:

- A Level 6 qualification, such as the OTHM Level 6 Diploma in Occupational Health and Safety, or an equivalent qualification.
- An honours degree with relevant knowledge and experience in the occupational health and safety sector.

Age requirement: Applicants should be 21 years or older at the beginning of the course.

Applicants with substantial relevant professional experience may be considered on a case-by-case basis.

English language: Applicants who are not from a majority English-speaking country may be required to provide evidence of English language competency.

All applications are subject to the awarding organisation's and approved centre's applicable admission requirements.

COURSE DELIVERY AND ASSESSMENT

Flexible Learning

The programme may be delivered through face-to-face sessions, lectures, tutorials, seminars, online learning or distance learning, depending on the approved centre's arrangements.

Assessment

All six units are assessed through assignments and evidence of achievement against the required learning outcomes and assessment criteria. The centre assesses the units, with external verification by OTHM.

Learners must successfully meet the assessment requirements for all mandatory units to achieve the qualification.

PROGRESSION OPPORTUNITIES

Upon successful completion, learners may be able to progress towards:

- Senior HSE and occupational health and safety management roles.
- Health and safety leadership and consultancy positions.
- Further postgraduate study, subject to university admission requirements.
- A Master's top-up programme at a university accepting the qualification.

Master's Degree Progression

The OTHM Level 7 Diploma carries 120 credits at Level 7 on the Regulated Qualifications Framework (RQF). It is comparable in level to postgraduate study but is not, by itself, a full Master's degree.

Learners seeking a full Master's qualification typically need to complete a further dissertation or other required study with a university, subject to its admission and credit requirements.
